HotmeltCleaner Metall SC-09

Vegetable-terpene cleaner for adhesive residues

Technical content reference: January 2024, revision 3. GlueEurope profile edition: 1.

PRODUCT DESCRIPTION AND APPLICATIONS

HotmeltCleaner Metall SC-09 is a cleaner based on vegetable terpene for removing adhesive residues, including cold hot-melt, vinyl-based and polychloroprene-based adhesives. It removes residues of many dispersion and hot-melt adhesives.

FOR PROFESSIONAL USE ONLY. Consult the safety data sheet before use.

TYPICAL PROPERTIES

Property	Unit / conditions	Value
Physical form	Visual	Liquid
Colour	Visual	Transparent
Odour	—	Citrus
Specific gravity	g/cm³ · at 25 °C	0.84 ± 0.02

DIRECTIONS FOR USE

1. Apply HotmeltCleaner Metall SC-09 to the surface to be cleaned, preferably cold, using a soft cloth or brush.

2. Allow it to act for a few minutes, then rub the surface with a cloth to remove the adhesive. For stubborn deposits, use a scraper or spatula if appropriate for the surface.

3. Repeat the procedure if necessary. On delicate surfaces, first test a small area to assess possible damage.

DO NOT APPLY TO HOT SURFACES, including the inside of melters, heating elements or applicators.

PACKAGING AND STORAGE

Packaging: 1 litre metal cans.
Storage stability: The source states at least 18 months at room temperature in closed original packaging.

Storage statement requires technical confirmation before commercial release: the source inconsistently refers to a different product name and “bags” despite specifying metal cans.

TECHNICAL NOTICE

The information is based on knowledge and experience and is indicative only. No express or implied warranty of suitability for any application is given. The customer must evaluate the product under actual application conditions through production and use tests to confirm all requirements, including operator and end-user health and safety. Repeat tests regularly, for each delivery and whenever process conditions, materials or material suppliers change. Handling and use are outside the supplier’s control; the buyer assumes the risk of direct and consequential damage from use, alone or in combination with other materials. For matters not covered here, refer to the applicable general conditions of sale and contact technical support.
